Quantitative Study of the Effects of the 2008-2009 Recession on the U.S. Economy

The 2008-2009 recession had a significant impact on the U.S. economy, leading to a sharp decline in GDP and a rise in unemployment. The chart illustrates the percentage change in various economic indicators during this period. GDP fell by 2.8%, while unemployment rose by 4.6%. Inflation increased by 0.4%, and consumer spending fell by 3.6%. Government spending increased by 1.1%, while net exports fell by 0.3%. Investment fell by 7.8%, and household savings increased by 0.1%. Business investment fell by 11.9%, and government investment increased by 0.1%.
